

## 3-3. My Own List

The screenshot shows a Visual Studio Code editor window with a dark theme. The Explorer sidebar on the left displays a file tree for a project named 'csc-121-python [WSL: archlinux]'. The file tree includes folders 'module-1', 'module-2', and 'module-3', and files 'cars.md', 'cars.py', 'changing\_guest\_list.py', 'greetings.py', 'guest\_list.png', 'guest\_list.py', 'languages.py', 'more\_guests.png', 'more\_guests.py', 'names.py', 'seeing\_the\_world.py', and 'shrinking\_guest\_list.py'. The 'cars.py' file is selected and open in the main editor. The code in 'cars.py' is as follows:

```
1 # car list
2 cars = ['toyota', 'mazda', 'bmw', 'acura']
3
4 message = f"I would like to own a {cars[0].title()}."
5 print(message)
6
7 message = f"I would like to own a {cars[1].title()}."
8 print(message)
9
10 message = f"I would like to own a {cars[2].title()}."
11 print(message)
12
13 message = f"I would like to own a {cars[3].title()}."
14 print(message)
```

Below the editor, the TERMINAL panel is active, showing the command 'python cars.py' and its output:

```
main alex alex-pc 19:24:10
I would like to own a Toyota.
I would like to own a Mazda.
I would like to own a BMW.
I would like to own a Acura.
```

The status bar at the bottom indicates the file is 'Ln 1, Col 12', has 'Spaces: 4', is in 'UTF-8' encoding with 'LF' line endings, and is a 'Python' file. The system tray shows the date and time as '19:24 2/9/2026'.
