

## 8-5. Cities

The screenshot shows a code editor interface with the following details:

- File Explorer:** Shows a project structure for "CSC-121-PYTHON [WSL: archlinux]". The "cities.py" file is selected and highlighted in the center.
- Code Editor:** Displays the content of "cities.py":

```
module-8 > cities.py > describe_city
1 def describe_city(city, country='The United States'):
2     """Print a simple statement about a city."""
3     print(f'{city.title()} is in {country.title()}.')
4
5 describe_city('asheville')
6 describe_city('new york')
7 describe_city('dublin', 'ireland')
```

- Terminal:** Shows command-line history in the bottom right corner:
  - zsh - module-8
  - main alex 19:34:55
  - ~ > classes /csc-121-python / module-8
  - python cities.py
  - Ashville is in The United States.
  - New York is in The United States.
  - Dublin is in Ireland.
- Bottom Bar:** Includes a search bar ("Type here to search"), taskbar icons, and status information: Ln 2, Col 49, Spaces: 4, UTF-8, LF, Python, Signed out, 3:14:2, 19:35, Temps to plummet, 2/21/2026.
