

2-4. Name Cases

The screenshot shows the VS Code interface with the following details:

- EXPLORER:** Shows a file tree for "CSC-121-PYTHON [WSL: archlinux]". The "name_cases.py" file is selected.
- EDITOR:** Displays the contents of "name_cases.py":

```
1 # 2.4
2 # Alex Towe
3 # February 2, 2026
4 # This program demonstrates different name cases using string methods.
5 name = "alex towe"
6 print(name.lower())
7 print(name.upper())
8 print(name.title())
9
```

- TERMINAL:** Shows the output of running the script:

```
~ > classes > csc-121-python > module-2 > python name_cases.py
alex towe
ALEX TOWE
Alex Towe
```

- STATUS BAR:** Shows the current file is "main*", the terminal is "zsh csc-121...", the agent is "Python mo...", and the date/time is "2/2/2026".
